DETAILED ACTION

Election/Restrictions

1. Applicant's election of group I, claims 1-9 and 11-14 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. This application contains claim 10 is drawn to an invention nonelected with traverse in Paper No. 7. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

WITHDRAWN REJECTIONS

3. The 35 USC 103(a) rejection of claim 4 as being unpatentable over Thomas et al. is withdrawn since applicant has canceled claim 4.

REJECTIONS REPEATED

4. The 35 USC 103(a) rejection of claims 1-9 and 11-12 as being unpatentable over Thomas et al. is repeated for the reasons of record in paper #9, pages 3-9, paragraphs 9-10. The 35 USC 103(a) rejection of claims 13-14 as being unpatentable over Thomas et al. in view of Koji et al. is repeated for the reasons of record in paper #9, pages 9-10, paragraph 11. Applicant has added new method limitations to claims 1, 3, 5 and 7. However, the method limitations do not structurally distinguish applicant's claimed

Art Unit: 1772

invention over the prior art and thus the prior art need not specifically disclose the method limitations to read on applicant's claims as written.

NEW REJECTIONS

5. There are no new rejections.

ANSWERS TO APPLICANT'S ARGUMENTS

6. Applicant's arguments filed 3/13/04 have been carefully considered but are deemed unpersuasive.

Applicant has argued (pages 2-3 of response of 3/13/04) that the amount of carbon and therefore compactness of the silicon oxide film are different than that of Thomas since applicant claims a different method than that which is disclosed in Thomas. However, the method limitations do not structurally distinguish applicant's claimed invention over the prior art and thus the prior art need not specifically disclose the method limitations to read on applicant's claims as written. Furthermore, applicant does not recite any limitations in the claims with respect to the amount of carbon and therefore compactness of the silicon oxide film.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., amount of carbon and therefore compactness of the silicon oxide film) are not recited in the rejected claim(s). Although the claims are interpreted in light of the

Art Unit: 1772

specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
